

### Overview:

We offer a number of different training formats for you and your team.

Here you can understand how to read our pricing and training locations.

For pricing for a SPECIFIC course – please contact us.

Here's an example of how we code our pricing and training locations:

**V (\$77) / OE (\$380) / OS (\$153)**

In this example students can sign up for V – virtual training at \$ 77, OE – open enrollment at \$ 380, and OS – on site at \$ 153. All pricing is per student and covers the entire cost for the training less expenses

Virtual: if applicable.

Virtual classes are (4) hours in length and require at least (1) hour of breakouts. These classes may be larger in size, but not to exceed (20). This is the best option to get general exposure to the respective content, but generally cover an abbreviated amount of material.

### Open Enrollment:

Open enrollment is done at standard locations listed below. These locations should allow clients to arrange direct flights keeping travel costs to a minimum. This option is recommended when client s have < 5 people that want to attend the training course.

### On Site:

Class sizes are restricted to (15) students. In order to reserve an OS class at your location we require that (10) – (15) students sign up for the course. Thus, the OS cost for this course that is listed above would be \$ 2,295.00. Travel expenses for the trainer are not included in this price. This option is preferred when you want the course to be catered to your industry and your applications.

### Training Abbreviations

- V: Virtual class done on-line
